## HIGHEST STANDARD OF SAFETY AND QUALITY

Above all we take care of our customer/user's of our product safety. EISA top most priority is safety in every aspect. For that EISA produce all safety critical components of lift by itself under strict norms (strictly follows each and every IS specifications and recommendations and some cases it follows international EN81 safety compliance).

At every steps of lift manufacturing process EISA ensures that Raw Material and workmanship manufacturing/installation Process are not underrated and substandard quality.

# WE ALL HAVE DUTY TO MINIMISE OUR ENERGY CONSUMPTION

## WORLD'S LATEST RELIABLE GREEN TECHNOLOGY

With continuous effort in R&D over the time EISA has come up with user friendly, highly reliable green products

- **SINGLE WIRE SERIAL TECHNOLOGY** - Apart power saving it Eliminate Lift complex wiring and connections by 80%, increase lift features & productivity and decrease Down time & troubleshooting time. EISA exporting this reliable technology worldwide.
- **STAND BY MODE** – The power side of the lift control will operate in sleep mode shutting down the lift car lighting, ventilation & indicators when not in use.
- **VVVF CONTROL** – Efficient Lift Motor will use a internationally recognized highly efficient dedicated lift Drive with capable of variable speed with variable voltage and variable frequency not only saves Energy but also run the system with Power Factor close to 1.

## MULTI FEATURE LIFT WITH LUCRATIVE DESIGN

Because of high technology EISA lifts come with the latest International Features which include display Running status of lift on each floor like Door opening, lift moving, door blocked, emergency stop pressed etc. along with arrival indicator with arrival chime and so many others available with high reliability with export quality aesthetic.

All these standard features are available at no extra cost which not only increase the lift passengers safety but increase the building aesthetic to manifold and increase building value.

## WHY TO CHOSE EISA

### Advantages of EISA Lifts over other Competitors –

- 1) **HIGHEST STANDARD OF SAFETY** – In house manufacturing of products under strict supervision and control EISA follows latest IS specifications make them to repeatedly work with organization – RITES LIMITED, NUCLEAR POWER CORPORATION and other various reputed government and private organization.
- 2) **HIGH QUALITY RAW MATERIAL** - EISA procure every raw material from trusted manufacturer without compromise in quality Mild steel is procured from Tata, Sail, Vizag only and stainless steel is procured directly from JINDAL STAINLESS, switchgear of seimens etc. Please refer to offer/representative to analyze complete Material Process Quality.
- 3) **LONG LIFE PRODUCT DESIGNED FOR WORST INDIAN CONDITIONS** – EISA believes in High Quality High Reliability Long Life Products for customer who need peace of mind, EISA DO NOT believe in low cost, short life ,constant breakdown product. High MTBF Product makes them to use in High Rise Building and Exporting them in other countries.
- 4) **AFFORDABLE MULTI FEATURED ADVANCE LIFT** – With serial Single Wire Technology and own-house Production, the lift EISA offers is fully loaded with bundles of features or luxury at no extra cost which makes your lift Exclusive and increase building esthetic and building value. Please refer to our offer/representative for latest advance features.
- 5) **FULLY TRAINED PERSONELS FOR QUICK SERVICE** – EISA believes in good product rather than good service. In spite all EISA service personals are fully trained and equipped to handle any breakdown of any EISA Product with minimum response time and thereafter every problem is thoroughly investigated to prevent repetition of that kind in future by our R&D Team for continuous product improvements.
- 6) **PUTTING CUSTOMER FIRST** - EISA makes every effort to gain a thorough understanding of its customers requirements, needs, and expectations from pt of enquiry handling to order processing and dedicated after sales service to feel customer like homely affair and pleasant feeling throughout.
